

# CHS™ Formula Commercial High Speed™

Ride-On™ TPS is a revolutionary sealant that makes any tyre into a self sealing tyre when punctured. While you drive the gel like sealant evenly coats the inner surface of your tyre. The coating helps eliminate chronic air leaks, balances the tyre, reduces the operating temperature of the tyre, reduces your CO2 footprint and instantly seals punctures up to ¼" in diameter using fibres that are six times stronger than steel. One application of Ride-On™ will last the legal life of your tyres. The result: your tyre expenses are dramatically reduced using Ride-On™.

## It's as easy as A,B,C,D,E.....

**Air pressure** – Ride-On™ helps eliminate porosity leaks that cause tyres to naturally deflate over time. Properly inflated tyres run cooler, last longer, use less fuel and reduces your CO2 footprint. Independent fleet tests have proven that tyres containing Ride-On™ maintain their pressure up to 500% better than untreated tyres.

**Balance Tires** – Ride-On™ TPS Commercial High Speed (CHS™) sealant helps to hydro dynamically balance tyres. Once Ride-On™ is installed in a tyre, it will dynamically act to dampen vibrations for the life of the tyre so you do not need periodic rebalancing. Ride-On™ does not clump up or clog valve stems.

**Cooler Tyres** – Tyres that are properly inflated and balanced run cooler and last longer. Less flexing, bounce and fatigue means cooler tyres and enhanced rim life – up to 25% more.

**Decrease Downtime** – Ride-On™ TPS makes any tyre a self sealing tyre when punctured. By eliminating up to 95% of flat tyres due to punctures in the crown of a tyre, we can keep your vehicle running, reduce breakdown calls and eliminate flat tyres. In the AA top ten reasons for vehicle breakdown flat / damaged tyres are reason number 3. For the RAC tyres were the number 2 cause for call outs representing 9.20% of all their call outs.

**Environment** – By maintaining the correct tyre pressure 500% better than an un-treated tyre Ride-On™ TPS will reduce the amount of fuel you use, which in turn reduces your CO2 emissions footprint.

## A REPUTATION YOU CAN "Ride-On™"

Ride-On™ has earned its reputation by providing the most advanced tyre sealing solutions to commercial and professional fleets. Ride-On™ TPS is currently used in more than 250,000 applications counties, government agencies and commercial fleets around the world.

*Ride-On™ TPS is available in formulations for every tyre application. Try our Heavy Duty off Road (HDOTR™) sealant for off-road equipment travelling at speeds less than 30mph. Ride-On™ TPS is also available for Motorcycle and Bicycle applications.*
