

CHS™ Formula

Commercial High Speed™

WE DON'T MAKE TYRES..... WE JUST MAKE THEM RUN BETTER!

Commercial High Speed™ Sealant (CHS™) is a revolutionary gel that helps balance tyres and turn them into self sealing tyres when punctured using fibres that are six times stronger than steel. CHS™ helps tyres maintain their pressure up to 500% better than untreated tyres. Properly inflated tyres that are balanced run cooler last longer and lower your CO2 footprint. The CHS™ Sealant is designed for use in cars, commercial vehicles, tractors, trailers, caravans, buses in fact any vehicle that travels in excess of 30mph.

FEATURES

- **Improves fuel economy** – Under inflated tyres have higher rolling resistance which will result in a loss of fuel economy
- **Lowers your CO2 footprint** – Improving your fuel economy lowers your CO2 output and will help save the environment
- **Seals punctures** – Prevents flats and seals multiple punctures up to ¼" in diameter. Helps seal slow leaks that cause tyres to deflate over time
- **Will not harm tyres and wheels** – Contains corrosion inhibitors to protect steel, aluminium and yellow metals from oxidation
- **Extends tyre life** – CHS™ helps balance tyres and helps tyres run cooler by eliminating the porosity leaks that lead to under inflated tyres
- **Safe to use** – Non-flammable, non-hazardous and biodegradable and does not void your manufacturer warranty
- **Water dispersible** – Washes out with plain water leaving no residue. Ride-On™ CHS™ will not prevent the application of section, tyre plug and patch repairs
- **Suitable for all weather conditions** – Specially formulated to prevent freezing at extremely low temperatures (-40 OF) and separation at high temperatures

A REPUTATION YOU CAN "Ride-On™"

Ride-On™ has earned its reputation by providing the most advanced tyre sealing solutions to commercial and professional fleets. Ride-On™ TPS is currently used in more than 250,000 applications counties, government agencies and commercial fleets around the world.

Ride-On™ TPS is available in formulations for every tyre application. Try our Heavy Duty off Road (HDOTR™) sealant for off-road equipment travelling at speeds less than 30mph. Ride-On™ TPS is also available for Motorcycle and Bicycle applications.
